## **DETAILED ACTION**

### ***Drawings***

The drawings or lack thereof are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. This Application requires drawings to convey to one of ordinary skill in the art what is being claimed. Therefore, the claimed laser cavity, including the claimed active layer/saturable absorbent material must be shown or the feature(s) canceled from the claim(s). In addition, drawings must show the process steps of Claim 31 to clearly illustrate what is being claimed. For example, the Applicant has claimed "cutting out the substrate-monocrystalline layer-mirrors complex thus obtained"; this step is not illustrated in a drawing. Other steps of the process claim need to be illustrated in a drawing. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2828

Claims 17-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 17 and all claims that depend therefrom (Claims 18-30 and 32), the Applicant has claimed the elements of "an entry mirror" and "an exit mirror." It is unclear/vague what the structural cooperative relationships are between these elements and the other claimed elements. Specifically, the position of these mirrors relative to the substrate, saturable absorber and active layer.

In addition, the lack of drawings, as discussed above, make it unclear/vague what is being claimed.

Regarding Claim 31, the Applicant has claimed, "cutting out the substrate-monocrystalline layer-mirrors complex thus obtained"; this step is unclear/vague. As discussed above, the lack of a drawing make it unclear/vague what is being claimed.
